SUMMARY

I love learning new things and I'm always up for a challenge. I'm a pretty hard worker and I like to figure out smart ways to solve tough problems. My main goal if I get the job is to learn and grow. I'm good at paying attention to the little things, and I'm really organized, so I make sure everything I do is done right. I'm studying Computer Programming & Analysis, so I've got a lot of skills with different programming languages and ways to make systems work better. I've also worked as an assistant, so I know how to communicate well, pay attention to details, and keep clients happy. I think all these skills make me a great team player. If I get this position, I am excited to contribute my existing skills in computer programming and analysis, and to further grow academically and professionally.

EDUCATION

Seneca College   **Toronto, ON**
Advanced Diploma in Computer Programming & Analysis   *Dec, 2025*
- Proficient in multiple programming languages, including C++, Javascript, HTML & CSS.
- Strong grasp of system methodologies, enabling effective software design and analysis.
- Experienced in both client and server-side development for web applications.
- Competent in the design, implementation, and maintenance of robust database systems, with a focus on data communication and web integration.

WORK EXPERIENCE

Carinexus S.A   **Guayaquil, Ecuador**
Assistant   *2022-2023*
- Developed strong communication skills by promptly responding to emails, addressing client inquiries, and maintaining professional interactions with colleagues and clients.
- Cultivated a keen eye for detail while categorizing and organizing project-related information, ensuring accuracy and reliability in record-keeping.
- Emphasized a client-centric approach by building positive relationships with clients, addressing their questions and needs, and contributing to client satisfaction, which is a valuable asset in customer-focused roles.
